

Apriva Vend™

Turning
Snacks
into
Sales

Make cashless vending profitable with Apriva Vend.

Apriva Vend™

Apriva Vend is a comprehensive, flexible cashless payment solution that gives vending machine operators the ability to accept all forms of cashless payment. Whether they manage food and refreshment machines, merchandise dispensers, or other unattended vending services, vendors can count on Apriva Vend to seamlessly help boost business. With this innovative solution, vendors can increase sales by providing more payment options, reduce operating expenses, and enhance the consumer's experience.

APRIVA VEND INCLUDES

SECURE WIRELESS TECHNOLOGY

Apriva's proprietary, PCI-compliant software encrypts and compresses all cashless payment data, ensuring it is transmitted securely and quickly. We also partner with AT&T, Verizon, Telefónica, and Rogers to support cashless payment transactions with world-class wireless networks.

ROCK-SOLID SECURITY

Apriva's wireless technology has been reviewed by the U.S. Intelligence Community and certified by the Department of Defense (DoD), proving its ability to provide unmatched security and ultimate confidence.

MULTIPLE PAYMENT TYPES, FLEXIBLE HARDWARE, ONE SOLUTION

Apriva offers high-quality hardware options that enable all forms of cash and cashless transactions with a single bezel that fits into the existing vending machine. It includes a payment and telemetry engine for reporting and machine monitoring, all connected wirelessly to the Apriva gateway.

FREEDOM TO CHOOSE

Apriva Vend offers the flexibility to connect vending machines to any vending management solution and any payment processor. Setting up a merchant account with a preferred financial services provider also gives operators more control over their finances with timely access to cashless vending revenues.

POWERFUL BACK-OFFICE REPORTING

Apriva Vend's web-based reporting system provides full visibility through customizable reports on cashless transactions, cash accountability, and reconciliation data.

CONSTANT INNOVATION

These key Apriva Vend features make vending operations more flexible and future-ready:

- Two-tier pricing to maximize profits
- Multi-Vend capabilities, allowing customers to buy multiple items in one transaction
- Interactive displays available to help keep up with technology
- Host-based batch processing to speed up settlement
- Apple Pay, Android Pay, Samsung Pay, and campus card acceptance to increase payment options and revenue
- DEX data routing to management systems for real-time information access
